Re: My Compact Cleaner

I started to use my compact cleaner in August 2004, and since then I have barely used my inhalor.

We went to a visit in Jutland, and I did not bring it along. During our stay it rained quite a lot. The second day of our stay I had to use my inhalor.

In general, I feel much better. My energy is higher and now that I have the compact cleaner I feel much better.

The device is on from the moment I go to bed and until I get out of bed again.

Best regards,  
Kristian Klit

**Re: Air-Tech Air Cleaner**

During the last 8 years I suffer from allergy and asthma and I take medicine on a daily basis.

As I saw a small advertisement for the Air-Tech Air Cleaner in the magazine "Hendes Verden" I thought: I need to test such an air cleaner!

During the last few months, I have now tested the Air-Tech Air Cleaner.

I have installed the Air-Tech Air Cleaner in my bedroom and have turned it on approx. one hour before I go to bed, in order to clean the air *before* I go to bed.

After having installed this air cleaner, I feel much fresher and more relaxed in the morning. And the best part is... I do not suffer from a "clogged" nose.

Even my husband, who is **not** suffering from allergy, feels much more fit in the morning!!

Therefore, I warmly recommend people with the same problems to test the Air-Tech Air Cleaner.

I, Bjarne Olsen, (49 years old and smoker) am suffering from asthma for 5 years and some of my friends, who used the air cleaner, told me about the Air-Tech Air Cleaner.

I then bought the Air-Tech Air Cleaner, and have been using it for one month.

As a result of using it:

I do no longer use inhalor  
I sleep through all night  
My head does not feel "heavy" in the morning  
I have had no headache  
My home does not smell smoky

All in all I feel that my everyday life has improved, and therefore I warmly recommend the use of the Air-Tech Air Cleaner.

Best regards,

Re: Compact Cleaner OZ 500

My girlfriend and I suffer from allergy to dogs and smoke for many years and having both a dog and a wood-burning stove, we have taken medication every day.

Having heard about your air cleaner through some of our friends, I contacted your company and had an OZ500 for testing. After only a few days, we agreed that it was a very good solution to our problems. From day one we did not take any medication as this was the only way to test the effect of the unit and none of us have had the need to take medication since. The only exception has been when we play with our dog on floor, but it is obvious that when you bore your head into the dog's fur then it must go wrong, however the attack is over soon as there are no allergy provoking compounds in the air.

Actually, we could not afford to buy the device, but we agreed to drop Christmas and spend the money on a better indoor climate and thus improved quality of life.

We warmly recommend others with similar problems to try an OZ 500 compact cleaner.
